

### Software release 1.10

Software release 1.10 is for the AXIS Camera Explorer for Pocket PC with part no: 0136-xxx. For buyers of previous versions the software upgrade is free of charge from the Axis web site. The 1.10 software as the previous versions can also be installed for a 14-day trial period for new users. All features of the previous software are retained. Settings and image database will be retained during the upgrade process.

The main highlights are:

#### ***PTZ support***

- Cameras connected to Axis PTZ capable devices like AXIS 2130, AXIS 241Q/S and AXIS 2400+/2401+ can now be moved by the Pocket PC.

#### ***Support for additional Axis Camera and Video Servers***

- Properties like model number and supported resolutions of new Axis devices are automatically detected. New Axis devices will be supported without the need for software upgrade of AXIS Camera Explorer for Pocket PC. First devices to utilize this are **AXIS 241Q/S** video server and **AXIS 210** network camera.

#### ***Other enhancements***

- N/A
