

Software release 1.12

Software release 1.12 is for the AXIS Camera Explorer for Pocket PC with part no: 0136-xxx. For buyers of previous versions the software upgrade is free of charge from the Axis web site. The 1.12 software as the previous versions can also be installed for a 14-day trial period for new users. All features of the previous software are retained. Settings and image database will be retained during the upgrade process.

The main highlights are:

Improved auto detection of device properties

- Improved automatic readout of camera properties like model number and supported resolutions.

Other enhancements

- Support for Windows Mobile 2003 Second Edition
